PROFESSIONAL PROFILE

First-Class Honours Geography Graduate (1:1) with hands on experience in GIS-led environmental risk assessments, UAV photogrammetry, and spatial change detection. Gained practical industry exposure through an environmental consultancy placement at Landmark Information Group, delivering complex land reports and planning for stakeholders. Proactive independent learner currently completing **Esri Academy learning plans** to master advanced spatial workflows. Combines a strong foundation in scientific methodology with practical data handling, seeking to apply these skills as a Graduate Environmental and GIS Specialist.

TECHNICAL STACK

- **GIS & Mapping:** QGIS, ArcGIS Pro, MapInfo, Magic Mapping, Ordnance Survey Data Integration.
- **Remote Sensing:** UAV Photogrammetry, Digital Surface Model (DSM) generation, DEM of Difference (DoD) analyses, Google Earth Engine.
- **Data & Programming:** Python (Pandas/GeoPandas), MS Office Suite (Advanced Excel/Data Analysis).
- **Compliance:** Understanding of UK Planning Frameworks (e.g., NPPF) and Environmental Due Diligence processes.
- **Qualifications:** Full UK Driving License

EDUCATION

Sept 2023 – June 2026

BSc (Hons) Geography - First-Class Honours (1:1)

Relevant Modules: GIS; Environmental Impact & Risk Assessment; Research Methods; Climate Change & Environmental Monitoring; Physical Geography Processes.

Dissertation Project: An Assessment of Winter Storm Damage at Telscombe Cliffs Using UAV Photogrammetry

- *Reconstructed dense 3D terrain models for monthly UAV datasets using ADAM 3DM photogrammetry software.*
- *Converted 3D models into high-resolution Digital Surface Models (DSMs) and transferred outputs to **ArcGIS Pro***
- *Applied Limit of Detection (LoD) threshold to filter sensor noise from true geomorphic erosion.*
- *Integrated Seaford Buoy wave heights and Newhaven tide Gauge data to build a cumulative excess wave energy proxy model in **Excel***
- *Adapted and modified **Python** scripts using AI code assistants to streamline automated spatial data workflows.*
- ***The applied methodology and techniques successfully revealed a one-month erosion delay with a statistical relationship $R^2=0.67$***

Geography (B), Psychology (B), English Literature (B)

RELEVANT INDUSTRY EXPERIENCE

June 2025 – July 2025

Environmental & Planning Risk Consultant (Placement)

- Produced technical **Residential Agricultural Land Reports (RALR)** using **QGIS**, identifying environmental liabilities and flood zone designations for legal stakeholders.
- Evaluated site variability for land and property transactions using professional geospatial tools (Ordnance Survey, Magic Mapping).
- Supported the early stages of land acquisition by presenting data-driven planning strategies to residents and legal firms.
- Developed a robust understanding of UK planning regulations and environmental due diligence.

ADDITIONAL WORK HISTORY

Hadden Hill Nursery

June 2026 - Present

Nursery Assistant

- Enforce health, safety and allergen awareness protocols
- Coordinate daily communications between room leaders, maintaining professional service under fast-paced, high-pressure conditions

Dobbies Garden Centre

July 2024 – August 2025

Customer Advisor

- Balanced part-time employment with full-time degree studies, managing complex inventory data and deliveries.
- Trusted to train new staff on POS systems and center operations during a major expansion phase.

Hilton DoubleTree

August 2022 – May 2023

Hotel Receptionist

- Managed front-desk operations using the ONQ booking system, reconciling funds and handling guest data.
- Resolved high-pressure customer conflicts, receiving multiple recommendations for professional service.
- Trained in emergency protocols, including natural disaster response and fire safety management.

ACHIEVEMENTS & VOLUNTEERING

- **Esri Academy:** Completed GIS fundamentals learning plan and is actively progressing through further learning pathways
- **Duke of Edinburgh's Award (Bronze)**
- **Gap Year (SE Asia):** Self-funded travel across 4 countries; developed high levels of organization and self-reliance.
- **Member of the Royal Geographical Society:** Engaging with advanced spatial research and industry webinars
